

## Juniper Networks forms a technology partnership with Riverbed Technology

Contracts & Orders, July 25, 2012

---

Juniper Networks has formed a technology partnership with Riverbed Technology to offer technologies pertaining to wide area network (WAN) optimisation, application delivery and mobility. {K2Splitter} Juniper Networks has formed a technology partnership with Riverbed Technology to offer technologies pertaining to wide area network (WAN) optimisation, application delivery and mobility.

Under the terms of the agreement, Juniper Networks is licensing Riverbed's application delivery controller technology for approximately \$75 million. This technology partnership will enhance Juniper's capabilities across the enterprise, including in the data center, across WANs, and consumer and business devices through new application networking technologies.

Both companies will also begin a joint effort to integrate Riverbed's Steelhead Mobile technology into the Juniper Networks Junos Pulse client to provide a mobile acceleration solution for mobile phones and tablets. Riverbed and Juniper Networks will also work together to deliver WAN optimization solutions to their respective customers.
