

The Nigeria-based internet service provider Direct On PC (DOPC) has deployed Shyam Networks Limited's (SNL) Point to Point (P2P) Radio - RM 58, to deliver internet services to its enterprise user community.

Anurag Garg, managing director, DoPC, said, "Driven by a strong need to incorporate reliable services, enterprise customers are always demanding to have better internet related services. This is where we have decided to go with Shyam's P2P radio products. We are very happy to have partnered with Shyam and it has surely brought a new sense of reliability and resiliency to our network, even in congested network conditions."

The P2P Radio - RM 58 is available in multiple frequency band, and it covers a distance of up to 40 km.

Nafis Kazim, chief operating officer, SNL, added, "Today's enterprise customers demands communication services which can deliver high speed broadband, bandwidth on demand and better quality of services. This is where SNL partnered with DoPC, where our carrier grade wireless broadband IP Radio is being used to enable true next generation communication infrastructure. Our P2P radios are time tested and provide seamless connectivity between places and deliver high capacity bandwidth, clubbed with long range IP backhaul capabilities."
