

Bharat Sanchar Nigam Limited (BSNL) has inked a machine-to-machine (M2M) communications deal with Tata Motors, wherein BSNL would supply embedded SIM cards to transform Tata's vehicles such as Tiago and Hexa into smart cars.

According to BSNL, 500,000 SIM cards have already been provided in this regard, while another one million would be supplied within a year's time.

Moreover, BSNL has anticipated sales of around 50 million M2M SIM cards with 5G capabilities over next year, primarily for the automobile and home automation sectors.

The operator's entry in the M2M space is expected to generate a revenue opportunity worth Rs 12 billion annually.
