

The FiberChek Sidewinder is the industry's first "all-in-one" handheld inspection and analysis solution for multifiber connectors such as MPO. The latest addition to Viavi's award-winning FiberChek family delivers a completely automated solution to inspect and analyze every fiber of an MPO or other multifiber connectors with industry-leading reliability and speed.

The FiberChek Sidewinder is the first solution on the market to completely automate the multifiber inspection process with industry-leading reliability and speed.

- Technicians can receive automatic pass/fail results for all 12 MPO fibers in less than twelve seconds, a typical job of certifying 100 MPO connectors can be completed in just 20 minutes, compared to the industry average of 4.3 hours (a 92 percent reduction).
- The all-in-one design provides completely autonomous operation with features including autofocus, auto-pan/scroll, endface analysis, color touch screen, on-board storage, and Wi-Fi connectivity to mobile devices.
- Ensures fast and reliable workflow for test and certification

Benefits

- Fully autonomous multifiber inspection
- Automate the inspection workflow
- Certify end face quality to customer requirements
- Ensure accurate and fast test performance with automatic test results in less than 12 seconds

- Easily access connections in any location
- Connect with anything and test anywhere!

Key Features

- Integrated touchscreen
- Live fiber viewing
- Auto-center
- Auto-focus
- Auto-pan/scroll
- Built-in fiber end-face analysis
- Audible sounds for Pass/Fail results
- User-selectable acceptance profiles

- Stores results on device or export
- WiFi, and USB connection to a PC and mobile devices
- All-day battery life
- Built in acceptance criteria to industry standards (IEC-61300-3-35)
