

Bharti Airtel has deployed long term evolution (LTE) 2100 technology to further upgrade its 4G network in Haryana. This will significantly enhance the network experience for its smartphone customers.

The operator's 4G rollout in the 2100 MHz spectrum band would now offer additional high-speed data capacity for 4G and will also drive voice traffic on voice over LTE (VoLTE).

Bharti Airtel's spectrum pool for its Haryana operations now includes 2,300 MHz (TD LTE), 2,100 MHz (LTE 2100), and 1,800 MHz (FD LTE).
